EDUCATION

Software Development

HANOI

FPT Polytechnic College

2023 – 2026

Final Year Student

- Core Coursework: Java Programming, Database Management (SQL Server), Web Development (Java/JSP), Agile Project Management, Software Testing.
- Focus: Practical projects adhering to real-world business requirements, database design, and application architecture.

PROJECTS

Clothing Retail Management System

Role: Java Developer

Oct 2023 – Aug 2024

A desktop application designed to streamline and manage the retail sales process for clothing stores. Built using Java, SQL Server, and JDBC.

- Designed Use Case diagrams, Entity-Relationship Diagrams (ERD), and implemented the database structure, ensuring data integrity with foreign key constraints.
- Developed core system modules including: Customer Management, Employee Management, Voucher/Discount Management, and Authentication (Login/Logout).
- Integrated JDBC for robust database connectivity and utilized Postman for API testing and validation.
- Utilized Git and GitHub for version control and team collaboration.
- Result: Successfully delivered the project, receiving highly positive feedback from instructors.
