EDUCATION

Software Development

HANOI

FPT Polytechnic College

2023 – 2026

Final Year Student

- **Core Coursework:** Java Programming, Database Management (SQL Server), Web Development (Java/JS), Agile Project Management, Software Testing.
- **Focus:** Practical projects adhering to real-world business requirements, database design, and application architecture.

PROJECTS

Clothing Retail Management System

Role: Java Developer

Oct 2023 – Aug 2024

Java desktop application for clothing retail operations. Built using **Java, SQL Server, and JDBC**.

GitHub: github.com/ngt-baor/Certain-Shop

- Designed database/ERD and implemented customer, employee, voucher, and authentication modules.
- Used JDBC, Postman, Git, and GitHub for database connectivity, testing, and collaboration.
- **Result:** Delivered a complete coursework retail management project.

DETAILS

Availability: Full-time

EzBook - Booking System

5/5/2026 - 12/6/2026

Role: Java Web Developer

GitHub: github.com/ngt-baor/EzBook

Booking management system for salon/spa operations using Java, Servlet/JSP, SQL Server/MySQL, and Gmail OTP.

- Built USER/STAFF/ADMIN workflows for booking, account, service, promotion, invoice, and statistics modules.
- Result: Completed a role-based Java web app with real booking and payment workflows.

DiscordLyrics Utility

13/6/2026 - 22/6/2026

Role: Desktop App Developer

GitHub: github.com/ngt-baor/Discord_Lyrics

Windows utility for syncing lyrics to Discord Custom Status using Electron, TypeScript, Express, and WebSocket.

- Integrated Spotify/SpotX and YouTube Music detection, lyric caching, popup mode, and system tray behavior.
- Result: Delivered a packaged desktop app with real-time status automation.

Messenger Desktop App

5/5/2026 - 19/6/2026

Role: Desktop App Developer

Status: In development

GitHub: github.com/ngt-baor/Messenger-reup

Windows Messenger client with multi-account support using Electron, JavaScript, HTML, CSS, and Electron Builder.

- Added account sessions, PIN lock, notification badge, dark/light mode, and system tray behavior.
- Result: Packaged the app into Windows installer/portable builds.

3D Portfolio Website

22/6/2026 - 30/6/2026

Role: Frontend Developer

GitHub: github.com/ngt-baor/3d-portfolio

Interactive portfolio deployed to Vercel using Next.js, React, TypeScript, Tailwind CSS, Spline, and GSAP.

- Customized 3D skill keyboard, project showcase, resume, social links, contact section, and SEO assets.
- Result: Published a responsive portfolio for presenting projects and contact information.

Grok Build App

Jul 2026 - Present

Role: Desktop App Developer

Status: In development

GitHub: github.com/ngt-baor/Grok-buid-app

Desktop workspace for project-based Grok CLI sessions using Electron, React, TypeScript, and Vite.

- Built project picker, multi-tab chat, file preview, Git status, settings, skills, and release update flows.
- Result: In development, focused on local workflow automation and packaged Windows releases.
