Role: Java Developer

GitHub: [github.com/ngt-baor/Certain-Shop](https://github.com/ngt-baor/Certain-Shop)

Java desktop application for clothing retail operations using Java, SQL Server, and JDBC.

- Designed database/ERD and implemented customer, employee, voucher, and authentication modules.
- Result: Delivered a complete coursework retail management project.

DETAILS

Availability: Full-time

Grok Build - Grok Desktop Workspace

Jul 2026 - Present

Role: Desktop App Developer  
GitHub: [github.com/ngt-baor/Grok-buid-app](https://github.com/ngt-baor/Grok-buid-app)

Windows desktop app for Grok CLI project workflows using Electron, React, TypeScript, and Vite.

- ~~Built project picker, multi tab chat sessions, file preview, diff view, Git status, skills library, and updater flow.~~
- Result: Completed a packaged desktop workflow for local Grok coding sessions.

EzBook - Booking System

5/5/2026 - 12/6/2026

Role: Java Web Developer  
GitHub: [github.com/ngt-baor/EzBook](https://github.com/ngt-baor/EzBook)

Booking management system for salon/spa operations using Java, Servlet/JSP, PostgreSQL, and Gmail OTP.

- Built USER/STAFF/ADMIN booking, account, service, invoice, promotion, and statistics workflows.
- Result: Deployed a role-based Java web app with real booking flows.

DiscordLyrics Utility

13/6/2026 - 22/6/2026

Role: Desktop App Developer  
GitHub: [github.com/ngt-baor/Discord\\_Lyrics](https://github.com/ngt-baor/Discord_Lyrics)

Windows utility for syncing lyrics to Discord Custom Status using Electron, TypeScript, Express, and WebSocket.

- Integrated Spotify/SpotX and YouTube Music detection, lyric caching, popup mode, and system tray behavior.
- Result: Delivered a packaged real-time status automation app.

Messenger Desktop App

5/5/2026 - 19/6/2026

Role: Desktop App Developer  
GitHub: [github.com/ngt-baor/Messenger-reup](https://github.com/ngt-baor/Messenger-reup)

Windows Messenger client with multi-account support using Electron, JavaScript, HTML, and CSS.

- Added account sessions, PIN lock, notification badge, dark/light mode, and system tray behavior.
- Result: Packaged the app into Windows installer and portable builds.

3D Portfolio - Personal Portfolio Website

22/6/2026 - 30/6/2026

Role: Frontend Developer  
GitHub: [github.com/ngt-baor/3d-portfolio](https://github.com/ngt-baor/3d-portfolio)

Interactive portfolio deployed to Vercel using Next.js, React, TypeScript, Tailwind CSS, Spline, and GSAP.

- Customized 3D skill keyboard, project showcase, resume, social links, contact section, and SEO assets.
- Result: Published a responsive portfolio for projects and contact information.
